Agile Essentials Card Deck
A unique reference and tool for agile adoption.

Supplementary Material

Access to electronic materials including slideware and supporting practice resources.

Agile Essentials Leadership Briefing

Get the essential lowdown on what agile is *really* all about, how it can transform the responsiveness and return-on-investment of your development organization, and how you can adopt more agile delivery strategies without risky and disruptive “rip-and-replace” process changes.

Duration: 0.5 – 1 day, depending on audience

Approach: Interactive Workshop

Description

At last! - an approach to agile transformation that enables proven practices to be adopted in an incremental and scalable way, enabling cohesive and controlled practice adoption without constraining team responsiveness and productivity.

This leadership briefing focuses on what really matters – the economic case for agile and the changes that are needed within your organization to fully realize the economic benefits of agility.

The briefing uses simulations to reveal the essential benefits, differentiators and change implications of agile.

It leverages the unique power of the Agile Essentials cards, which put the essentials for success literally into the hands of practitioners and managers alike. The Agile Essentials cards:

- Put professional practices into the hands of practitioners
- Empower the team to select the right practices for them
- Ensure a cohesive and aligned approach
- Increase visibility, transparency and governance
- Ensure coverage of all key process risks and concerns
- Enable controlled and continuous process improvement
- Support smooth scaling to achieve ever greater benefits.

You will learn:

- How agile delivers transformational benefits
- Optimizing across the value chain to fully realize the benefits
- Myth-Busting - what agile fundamentally is and is not
- Agile principles and values - application and impact
- Essential Agile Practices - highlighting what matters for success
- Process adaptation - through practice selection and adoption
- Agile at Scale - the challenges and key practices for success
- Retrospective - reflection on learning and change prioritization.
